Prior to coming to campus or while on campus if you are experiencing any of the following symptoms that are new, worsening or occurring in a way that is not normal for any chronic conditions you may have, please remain or return home. Employees should notify their supervisor.

- Cough
- Shortness of breath or difficulty breathing
- Chills
- Repeated shaking with chills
- Muscle pain
- Headache
- Sore throat
- Loss of taste or smell
- Diarrhea
- Feeling feverish or a measured temperature greater than or equal to 100.4 degrees Fahrenheit

If you have been in close contact with a person who is lab-confirmed to have COVID-19, you may not return to work or class until the end of the 14-day self-quarantine period from the last date of exposure. You are required to complete the Self Disclosure and Close Contact Form.

If diagnosed with COVID-19, you are also required to complete the Self Disclosure and Close Contact Form. You may return to campus when all four of the following criteria are met:

- At least 3 days (72 hours) have passed since recovery (resolution of fever without the use of fever-reducing medications);
- Improvement in symptoms (e.g. cough, shortness of breath);
- At least 10 days have passed since symptoms first appeared
- You have obtained a note from a medical professional clearing you for return to work or class

If you have symptoms that could be COVID-19 and do not get evaluated by a medical professional or tested for COVID-19, you are assumed to have COVID-19 and may not return to work or class until you have completed the same four-step criteria listed above.

If you have symptoms that could be COVID-19 and want to return to work or class before completing the above self-isolation period, you must obtain a medical professional’s note clearing you for return based on an alternative diagnosis.
