

CORONAVIRUS PREVENTION

What you can do to prevent the spread of the virus

For UTA resources and information, please visit uta.edu/coronavirus

Wash Your Hands Frequently

- Always wash your hands after using the restroom or touching widely used public surfaces.
- Avoid touching your face with your hands.

Practice Social Distancing

Stay 6 feet away from other people to help prevent the virus from spreading.

Wear Face Covering

Face coverings **must** be worn while in campus buildings (except private offices, alone in labs, or in apartment/residence hall rooms) and when social distancing is difficult to maintain.

Cover Coughs and Sneezes

- Use tissues to cover your coughs and sneezes, or use your elbow if tissues are unavailable.
- Avoid coughing or sneezing directly into your hands.

Clean Your Surroundings

Disinfect frequently touched objects and surfaces such as phones, desks, tables, keyboards, remote controls, doorknobs, etc.

Stay Home If You're Sick

- If you have any symptoms, avoid going to school and work.
- Avoid or minimize close contact with sick people.
