ANTH 2307 BIOLOGICAL ANTHROPOLOGY*

Biological (or physical) anthropology is the study of human variation and evolution. This course provides the foundation for further study of human variation, evolution, anatomy, and is recommended for anyone with an interest in a career related to human biology, including forensics, medicine, and archaeology. Included within the discipline is the subfield of primatology: anthropologists study non-human primates both for their own sakes and for the insights they provide into the evolution of humans. Three broad topical areas are covered in this course: Genetics, human variation & adaptation; Primate anatomy, behavior, & evolution; and Hominin evolution.
