The Master of Science in Information Systems is a STEM-designated program designed to provide graduates with both a general knowledge of business and a specialized knowledge of information systems. Offered weeknights in Arlington, the MS in Information Systems program exposes students to theory, research, and practical applications in areas including management information systems, database management systems, systems analysis and design, data communications, cloud computing, cybersecurity, and business analytics. This program is designed to prepare students for information systems careers in business and industry, as well as in government and nonprofit organizations.
