

Preceptor Program for College of Nursing Health and Innovation

Graduate Nursing MSN/Post Masters Certificate Family NP Courses

Course Number

NURS 5432

Course Name

Family I

Course Description

This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on pediatric wellness, women's health, men's health, and geriatrics concepts and conditions.

Course Outcomes

1. Evaluate theoretical and empirical knowledge of designated acute, chronic and complex health problems in primary care practice for individuals and families across the lifespan.
2. Assess diagnose and manage the health care needs of individuals across the lifespan with designated acute, chronic and complex problems.
3. Apply evidenced-based practice guidelines to the planning of comprehensive health care for individuals and families across the lifespan.
4. Plan health promotion, health protection, and disease prevention approaches in the care of individuals and families across the lifespan.
5. Plan health education, coaching, shared decision-making, and counseling strategies in the care of individuals and families across the lifespan.
6. Plan care that is sensitive to individuals and families across the lifespan in the domains of culture, spirituality, age, gender, and sexual orientation.
7. Identify collaborative roles of other health professionals in the care of individuals and families across the lifespan.

Course Number

NURS 5433

Course Name

Family II

Course Description

This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of commonly occurring conditions seen in primary care patients across the lifespan.

Course Outcomes

1. Evaluate theoretical and empirical knowledge of designated acute, chronic and complex health problems in primary care practice for individuals and families across the lifespan.
2. Assess diagnose and manage the health care needs of individuals across the lifespan with designated acute, chronic and complex problems.
3. Apply evidenced-based practice guidelines to the planning of comprehensive health care for individuals and families across the lifespan.
4. Plan health promotion, health protection, and disease prevention approaches in the care of individuals and families across the lifespan.
5. Plan health education, coaching, shared decision-making, and counseling strategies in the care of individuals and families across the lifespan.
6. Plan care that is sensitive to individuals and families across the lifespan in the domains of culture, spirituality, age, gender, and sexual orientation.
7. Identify collaborative roles of other health professionals in the care of individuals and families across the lifespan.

Course Number

NURS 5434

Course Name

Family III

Course Description

This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on adult wellness, psychiatric, and cardiometabolic concepts and conditions.

Course Outcomes

1. Evaluate theoretical and empirical knowledge of designated acute, chronic and complex health problems in primary care practice for individuals and families across the lifespan.
2. Assess diagnose and manage the health care needs of individuals across the lifespan with designated acute, chronic and complex problems.
3. Apply evidenced-based practice guidelines to the planning of comprehensive health care for individuals and families across the lifespan.
4. Plan health promotion, health protection, and disease prevention approaches in the care of individuals and families across the lifespan.
5. Plan health education, coaching, shared decision-making, and counseling strategies in the care of individuals and families across the lifespan.

6. Plan care that is sensitive to individuals and families across the lifespan in the domains of culture, spirituality, age, gender, and sexual orientation.
7. Identify collaborative roles of other health professionals in the care of individuals and families across the lifespan.

Course Number

NURS 5337

Course Name

Clinical Practice I

Course Description

Initial clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the family nurse practitioner role in evidenced based patient care.

Course Outcomes

1. Assess, diagnose, and manage the health care and prevention needs of individuals and families in wellness or acute/chronic conditions in primary care settings.
2. Incorporate technology in care planning to improve outcomes and promote safety in primary care settings.
3. Utilize communication, collaboration and consultation with interprofessional colleagues/teams to improve patient outcomes across the lifespan.
4. Identify the health impact of cultural and spiritual diversity in individuals' families and populations across the lifespan in the clinical setting.
5. Demonstrate selected advanced practice skills in an online simulated patient environment.
6. Select appropriate diagnostic and therapeutic procedures based on patient assessment criteria.
7. Interpret diagnostic test data and formulate management plan based on results.
8. Analyze research findings and health care organization practices related to selected procedures.

Course Number

NURS 5338

Course Name

Clinical Practice II

Course Description

Continued clinical preceptorship with opportunities for increased clinical knowledge in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the family nurse practitioner role in evidenced based patient care.

Course Outcomes

1. Assess, diagnose, and manage the health care and prevention needs of individuals and families in wellness or acute/chronic conditions in primary care settings.
2. Incorporate technology in care planning to improve outcomes and promote safety in primary care settings.
3. Integrate quality management and improvement concepts in the clinical setting to improve patient outcomes across the lifespan.
4. Utilize communication, collaboration, and consultation with interprofessional colleagues/teams to improve patient outcomes across the lifespan.
5. Demonstrate selected advanced practice skills in an online simulated patient environment.
6. Select appropriate diagnostic and therapeutic procedures based on patient assessment criteria.
7. Interpret diagnostic test data and formulate management plan based on results.
8. Analyze research findings and health care organization practices related to selected procedures.

Course Number

NURS 5660

Course Name

Family NP Advanced Practicum

Course Description

Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of advanced nursing practice.

Course Outcomes

1. Use evidenced-based knowledge to manage the health care in selected populations.
2. Provide comprehensive health care (e.g. age, gender, cultural, ethnic sensitive) to patients, families, and/or groups within the ethical and legal scope of advanced nursing practice.
3. Evaluate patient and family outcomes for the purpose of monitoring and modifying care.
4. Collaborate with other health care professionals to provide comprehensive care.
5. Implement the nurse practitioner role in selected settings.
