SMART TRAINING

"Assisting others in reaching their potential"

Capability Statement

www.smarttraining.com

Smart Training is a small business that has a custom-built Learning Management System. Our mature, comprehensive software provides a better way to deliver learning online, from tracking to dashboard reports in real-time. We can import your existing courses into our system, or you can use our internal course builder to create your own courses. With an active software development team, we stay ahead of the competition through regular system enhancements to offer a quality learning platform that is continually improving.
