Architectural Engineering Course Information

- A course number shown with an asterisk (HIST 1311*) is a General Education course. These courses are neither pre-professional nor professional program Architectural Engineering courses.
- A course number shown with normal weight and without an asterisk (AREN 1205) is an Architectural Engineering pre-professional course. A grade of C or better must be earned in each Architectural Engineering pre-professional course.
- A course number shown in bold (**AREN 3341**) is an Architectural Engineering professional program course. Enrollment in a 3000 or 4000 level Architectural Engineering professional program course requires admission to the Architectural Engineering professional program or written permission from the department academic advisor.
- Requisite courses are shown in parentheses (MATH 1323). A requisite course designated ^{oo} (MATH 1421^{oo}) may be taken concurrently at UTA. A requisite course designated ^{or} (AREN 3143^{or}) must be taken concurrently at UTA. All other requisite course are prerequisites. Architectural Engineering majors (AREN, AREN Intended, and AREN UCOL) may not attempt a course before earning a grade of C or better in all prerequisite courses.

General Core Requirements

- Students majoring in Architectural Engineering must take **ARCH 1301**, which is a Creative Arts elective option. If a student has taken a different course from the approved Creative Arts elective list, it will be counted as part of your core curriculum. However, ARCH 1301 will also need to be completed to satisfy the course requirement for the Architectural Engineering degree plan.
- Students majoring in Architectural Engineering must take **IE 2308**, which is a Social & Behavioral Sciences elective option. If a student has taken a different course from the approved Social & Behavioral Sciences elective list, it will be counted as part of your core curriculum. However, IE 2308 will also need to be completed to satisfy the course requirement for the Architectural Engineering degree plan.
- The UTA Architectural Engineering Program requires two (six SCH) U.S. History courses. The two courses can be chosen from the following list of courses offered at UTA.

HIST 1301	History of the United States to 1865
