A course number shown in bold (**CM 33--**) is a CM professional program course. Enrollment in a 3000 level CM professional program course requires admission to the CM professional program or written permission from the CE Chair (Permission Letter).

Enrollment in a 4000 level professional program course requires admission to the CM professional program.

A course number shown with normal weight and without an asterisk (CM 1311) is a CM pre-professional course. A grade of C or better must be earned in each CM pre-professional course.

A course number shown with an asterisk (HIST 1311\*) is neither a CM professional program course nor a designated CM pre-professional program course. However, completion of six semester credit hours of these courses with an earned grade of C or better is required for admission into the CM professional program.

Requisite courses are shown in parentheses (MATH 1302). A requisite course designated <sup>CP</sup> (ENGL 1301<sup>CP</sup>) may be taken concurrently at UTA. All other requisite courses are prerequisites. No student may attempt a CM course before earning a grade of C or better in all prerequisite courses.

CM 4331 prerequisites: Completion of all CM 3000 level courses, a grade of C or better in all CM courses.
