Directors's Corner

Jandel Crutchfield, PhD, LCSW

One of the reasons I LOVE Black history month is because as a social worker, there are so many examples of monumental leaders that garnered national recognition for their efforts to better society. Ida B. Wells is my favorite social work, Black history heroine. Not only did she look the practice of lynching in the face and shine a light on it, but she also looked the mostly white social work profession in the face to call for racial justice. Her early calls for an anti-racist lens are finally seen in our newest student competencies for social work. We owe Ms. Wells and others for the betterment of our profession!

BLACK HISTORY MONTH

The fact that there are still Black "firsts" happening in our world in 2023 gives us a glimpse at the need for celebrating Black history. Black peoples in the United States have overcome great hardships to thrive, break glass ceilings, and contribute to the successes of America despite barriers being purposely put in the way. While some deny the value of Black History, we celebrate Black history: the good, the ugly, and everything in between.
